Note: Any student who meets one half of the "AND" statement but not the other may appeal to be allowed to take the course. If sufficient evidence is present that the student has the required math background to be successful then the appeal will be granted and the student will be allowed entrance into the course. If the student is unsuccessful after having been granted an appeal then the student is not automatically allowed to retake the same course.

GENERAL NOTE: Students qualify to take the highest level course available for that student based upon placement scores. However, placement should be based upon all forms of evidence and a conversation with the student.
